## REVIEW & INVESTMENT STRATEGY

In September 2025, the Fund rose by 2.40%, underperforming the Benchmark by 75 basis points (bps) while on a year to date (YTD-FY)<sup>1</sup> basis, the fund underperformed the benchmark by 108 bps, with the YTD-FY return of 6.94% as the underperformance was mainly contributed by the weight in Gloves and selective Technology and Real Estate. Malaysia's manufacturing sector remained close to stabilization in September with a relatively unchanged reading of 49.8pts vs 49.9pts in the previous month. Where new order rose, firms mentioned new project launches and higher client confidence, notably in the domestic economy. Firms were also buoyed by a milder rise in input price inflation, which was at a 5-month low, amid softer raw material price pressure. Business sentiment strengthened from August, with the degree of confidence the highest since February - manufacturers remain upbeat on output growth in the coming year. The latest PMI reading suggests that GDP growth in 3Q25 could see an uptick from the previous quarter. To recap, Malaysia's GDP grew 4.40% in 2Q25 similar to 1Q25. BNM now expects Malaysia's GDP to grow 4.00% - 4.80% in 2025 vs. 4.50% - 5.50% previously, largely reflecting the impact of US tariffs on global trade. On OPR, we do not expect any more revisions following the 25 bps cut by BNM in July. Inflation marginally higher at 1.30% in August vs. 1.20% in July. The FBMS's valuation is below to historical mean at 18.1x. More clarity on the new Government's policy posture, in our view, should reduce the current risk premiums applied to the market (yield gap of ~211 bps). Sustained strength in domestic investments (both DDI and FDI), fiscal consolidation gathering pace (in particular, subsidy rationalisation initiatives) and the strengthening of the Ringgit are factors we see supportive of the further narrowing of risk premiums and consequently higher valuation multiples. Equity markets regionally seem to have recovered almost fully from Liberation Day tariff-related sell-off in April, and Malaysia is no exception. However, given the current uncertain global environment, we believe near term volatility is expected to continue especially due to the US administration's unpredictability. Trump's trade policies could weigh on market confidence and pressure Malaysia's growth and earnings outlook despite improving clarity recently. That said, downside risks may be partially cushioned by several supportive domestic driven initiatives and factors. We maintain balanced approach but tilt towards sectors with better clarity of earnings<sup>2</sup>.

Note: 1) YTD-FY reflects the period beginning 1 April 2025; 2) Commentary is based on target fund performance. "Target fund" is referring to the underlying collective investment schemes.

## REVIEW & INVESTMENT STRATEGY

In September 2025, the Fund rose by 2.09%, outperforming the Benchmark by 14 basis points (bps) while on a year to date (YTD-FY)<sup>1</sup> basis, the fund outperformed the benchmark by 199 bps, with the YTD-FY return of 7.16%. Malaysia's manufacturing sector remained close to stabilization in September with a relatively unchanged reading of 49.8pts vs. 49.9pts in the previous month. Where new order rose, firms mentioned new project launches and higher client confidence, notably in the domestic economy. Firms were also buoyed by a milder rise in input price inflation, which was at a 5- month low, amid softer raw material price pressure. Business sentiment strengthened from August, with the degree of confidence the highest since February - manufacturers remain upbeat on output growth in the coming year. The latest PMI reading suggests that GDP growth in 3Q25 could see an uptick from the previous quarter. To recap, Malaysia's GDP grew 4.40% in 2Q25 similar to 1Q25. BNM now expects Malaysia's GDP to grow 4.00% - 4.80% in 2025 vs. 4.50% - 5.50% previously, largely reflecting the impact of US tariffs on global trade. On OPR, we do not expect any more revisions following the 25 bps cut by BNM in July. Inflation marginally higher at 1.30% in August vs. 1.20% in July. Equity markets regionally seem to have recovered almost fully from Liberation Day tariff-related sell-off in April, and Malaysia is no exception. However, given the current uncertain global environment, we believe near term volatility is expected to continue especially due to the US administration's unpredictability. Trump's trade policies could weigh on market confidence and pressure Malaysia's growth and earnings outlook despite improving clarity recently. That said, downside risks may be partially cushioned by several supportive domestic driven initiatives and factors. We maintain balanced approach but tilt towards sectors with better clarity of earnings<sup>2</sup>.

## REVIEW & INVESTMENT STRATEGY

For the month of September, the Fund contracted by 0.05% outperformed its benchmark by 0.26%. On the year to date (YTD-FY)<sup>1</sup>, the Fund stood at 3.20%, underperforming the benchmark by 6 bps. In September, the Government Investment Issues ("GII") shifted higher across the curve by 6 bps to 13 bps across the curve with the 10-yr and 30-yr rose by 7 bps and 10 bps respectively to close the month at 3.50% and 4.03%. The subdued market sentiment during the month was mainly due to the fading expectation of further monetary policy easing on the back of resilient economic outlook, higher global rates as well as a broad-based quarter end profit taking activities. The selloff was also spurred by duration supply pressure and the strong corporate issuance pipeline. Market weakness was further exacerbated by the GBI-EM index change during the month which has partly contributed to the foreign outflow in September. Bank Negara Malaysia held Overnight Policy Rate unchanged at 2.75% in its September Monetary Policy Committee meeting, viewing the rate appropriate to balance growth with price stability. The statement also adopted a more constructive tone, noting that conclusion of tariff negotiations helped reduce global uncertainty. The 2025 fiscal deficit target of 3.80% remains on track and achievable. Government bond auctions in the month of September saw weakened demand especially for longer dated bonds. Despite tepid demand, upcoming maturity of RM24.5 billion in October 2025 against expected net issuance of RM12 billion provide technical support as investors are likely to rollover while climbing up yield curve for better yields. The next macro event is the tabling of Budget 2026 which is anticipated to outline Malaysia's medium-term fiscal framework and growth trajectory. Meanwhile, market is expected to stay range bound ahead of the Budget 2026. Overall, we maintain our strategy and continue to overweight in the credit segment for better total return. We remain our overweight duration bias relative to the benchmark<sup>2</sup>.

## GROWTH FUND

### Investment Strategy & Approach

The fund will invest in Shariah compliant equities listed on Bursa Malaysia whereby the target investments will be large cap stocks with growth prospects and where trading is fairly liquid.

### Asset Allocation

The investment portfolio is subjected to the following:

- Up to 98% of the Portfolio shall be invested in Shariah compliant equity securities;
- At least 2% of the Portfolio will be invested in Shariah based liquid assets;
- The value of the Portfolio's holding of the share capital of any single issuer must not exceed 10% of total asset of Portfolio;
- The value of the Portfolio's holding in transferable securities issued by any single issuer must not exceed 15% of the Portfolio's Net Asset Value (NAV);
- The value of the Portfolio's holding of the share capital of any group of companies must not exceed 20% of total asset of the Portfolio;
- Shariah-compliant deposits can only be placed in licensed Financial Institutions by Bank Negara Malaysia (BNM).

## BALANCED FUND

### Investment Strategy & Approach

The Portfolio will invest in diversified portfolio of Shariah compliant equities listed on Bursa Malaysia and Sukuk investments. The strategy of the fund is to maintain a balanced portfolio between Shariah compliant equities and fixed income investments in the ratio of 60:40. The Sukuk portion of the Fund is to provide some capital stability to the Fund whilst the equity portion will provide the added return in a rising market.

### Asset Allocation

The investment portfolio is subjected to the following:

- Up to 60% of the Portfolio shall be invested in Shariah compliant equity securities;
- Investment in fixed income securities and liquid assets shall not be less than 40% of the Portfolio's NAV;
- At least 2% of the Portfolio will be invested in Shariah based liquid assets;
- The value of the Portfolio's holding of the share capital of any single issuer must not exceed 10% of total asset of Portfolio;
- The value of the Portfolio's holding in transferable securities issued by any single issuer must not exceed 15% of the Portfolio's NAV;
- The value of the Portfolio's holding of the share capital of any group of companies must not exceed 20% of total asset of the Portfolio;
- Minimum Long Term Issuer Credit Rating of "A3" as assessed by Rating Agency Malaysia Berhad ("RAM") or equivalent by Malaysia Rating Corporation Berhad ("MARC");
- Minimum Short Term Issuer Credit Rating of "P3" as assessed by RAM or equivalent by MARC;
- Shariah-compliant deposits can only be placed in licensed Financial Institutions by BNM.

## FIXED INCOME FUND

### Investment Strategy & Approach

The investment strategy of the fund is to invest in a diversified portfolio consisting of Sukuk, short term money market instruments and other permissible investments under the Shariah principles and aim to provide a steady stream of income.

### Asset Allocation

The investment portfolio is subjected to the following:

- Up to 98% of the Portfolio shall be invested in Shariah compliant fixed income securities;
- At least 2% of the Portfolio will be invested in Shariah based liquid assets;
- Minimum Long Term Issuer Credit Rating of "A3" as assessed by RAM or equivalent by MARC;
- Minimum Short Term Issuer Credit Rating of "P3" as assessed by RAM or equivalent by MARC;
- The exposure to any single entity for sukuk (not applicable to government securities, BNM's securities, quasi and low risk assets granted by BNM) shall not exceed 20% of the NAV of the Portfolio;
- The value of the Portfolio's holding in sukuk (not applicable to government securities, BNM's securities, quasi and low risk assets granted by BNM) of any group of companies must not exceed 30% of the NAV of the Portfolio;
- The Malaysian Islamic Money Market Instruments must be rated at least P3 by RAM or equivalent;
- Shariah-compliant deposits can only be placed in licensed Financial Institutions by BNM.

The investment is subject to the following risks:-

1. **Market risk** - The risk that arises due to developments in the market environment and typically includes changes in regulations, politics, technology and the economy. Diversification of the Fund's investments into different unit trust funds of different types (equity or non-equity etc.) and with different investment policy and strategies may help to mitigate its exposure to market uncertainties and fluctuations in the market.
2. **Profit rate risk** - This risk is crucial in a Sukuk fund since Sukuk portfolio management depends on forecasting interest rate movements. Generally, demand for Sukuk move inversely to interest rate movements therefore as interest rates rise, the demand for Sukuk decrease and vice versa. Furthermore, Sukuk with longer maturity and lower profit rates are more susceptible to interest rate movements. Sukuk are subject to interest rate fluctuations with longer maturity and lower profit rates Sukuk being more susceptible to such interest rate movements. This risk can be mitigated through continuous monitoring and evaluation of macro-economic variables to ensure the most appropriate strategy is in place for the Fund's portfolio.
3. **Credit / Default Risk** - Bonds are subject to credit/default risk in the event that the issuer of the instrument is faced with financial difficulties, which may decrease their credit worthiness. This in turn may lead to a default in the payment of principal and interest/ profit.
4. **Liquidity Risk** - Liquidity refers to the ease of converting an investment into cash without incurring an overly significant loss in value. Should there be negative developments on any of the issuers, this will increase liquidity risk of the particular security. This is because there are generally less ready buyers of such securities as the fear of a credit default increases. The risk is managed by taking greater care in security selection and diversification.
5. **Non-compliance risk** - Non-adherence with laws, rules, regulations, prescribed practices, internal policies and procedures may result in tarnished reputation, limited business opportunities and reduced expansion potential for the management company. Investor's investment goals may also be affected should the fund manager not adhere to the investment mandate. This risk can be mitigated through internal controls and compliance monitoring.
6. **Inflation Risk** - Inflation risk can be defined as potential intangible losses that may arise from the increase in prices of goods and services in an economy over a period of time. Inflation causes the reduction in purchasing power and if the rate of inflation is constantly higher than the rate of returns on investments, the eventual true value of investments could be negative.
7. **Issuer risk** - This risk refers to the individual risk of the respective companies issuing the securities. Specific risk includes, but is not limited to changes in consumer tastes and demand, legal suits, competitive operating environments, changing industry conditions and management omissions and errors. However, this risk is minimised through investing in a wide range of companies in different sectors and thus function independently from one another.
8. **Country risk** - The foreign investments may be affected by risks specific to the country in which investments are made such as changes in a country's economic fundamentals, social and political stability, currency movements, foreign investment policies and etc. This risk may be mitigated by conducting thorough research on the respective markets, their economies, companies, politics and social conditions as well as minimising or omitting investments in such markets.
9. **Management Risk** - There is risk that the management may not adhere to the investment mandate of the respective fund. With close monitoring by the investment committee, back office system is being incorporated with limits and controls, and regular reporting to the senior management team, the management company is able to manage such as risk.
10. **Fund Management Risk** - Poor management of the fund due to lack of experience, knowledge, expertise and poor management techniques would have an adverse impact on the performance of the fund. This may result in investors suffering loss on their investment of the fund.
11. **Shariah risk** - The risk that arises from potential revision on the status of the securities in the unit trust fund from Shariah compliant to non-Shariah compliant and the possibility of investing in non-Shariah compliant unit trust funds. This risk may be mitigated by conducting periodic review by Shariah Compliance Department and Shariah Committee. Thus necessary action to be taken by Fund Manager to dispose such securities as per advice by Shariah Compliance Department and Shariah Committee.

## NOTES ON FEES AND CHARGES

Actual Returns  
(Net of Tax and Charges)

1. Past performance of the fund is not an indication of its future performance.
2. This is strictly the performance of the investment fund, and not the returns earned on the actual contributions paid of the investment-linked product.
3. Units are created and cancelled at the next pricing date following receipt of contribution or notification of claim respectively.
4. Past performance is calculated based on the Net Asset Value (NAV).

## OTHER INFORMATION

Basis & Frequency of  
Unit Valuation

1. The unit price on any valuation date of a fund shall be obtained by dividing the NAV on the business day before the valuation date by the number of units in issue of the relevant fund.
2. The NAV shall be determined as follows:-
  - a) The last transacted market price at which those assets could be purchased or sold,
  - b) Plus the amount of cash held uninvested
  - c) Plus any accrued or anticipated income
  - d) Less any expenses incurred in purchasing or selling assets
  - e) Less any amount for the liabilities of the Fund
  - f) Less the amount in respect of managing, maintaining and valuing the assets
3. To ensure fair treatment to all unit holders, the Fund Manager may impute the transaction costs of acquiring or disposing of assets of the Fund, if the costs are significant. To recoup the cost of acquiring and disposing of assets, the Manager shall make a dilution or transaction cost adjustment to the NAV per unit to recover any amount which the Fund had already paid or reasonably expects to pay for the creation or cancellation of units.
4. Unit valuation is performed on a daily basis on each Business Day.

Exceptional Circumstances

The Manager may take the following actions that may become necessary due to change of circumstances, as a means to protect the interest of Participants:-

1. Subject to at least three (3) months written notice, the Manager may:-
  - a) Close the Fund or cease to allow the allocation of additional contribution or to transfer the assets to a new fund which has similar investment objectives;
  - b) Change the name of the Fund
  - c) Split or combine existing units of the Fund;
  - d) Make any changes that may be required due to regulatory requirement and/or legislation.
2. The Manager may also choose to, without prior notice, suspend unit pricing and Certificate transactions if any of the exchanges or unit trust management company in which the Fund is invested is temporarily suspended for trading.

## STRATEGI PELABURAN

Pada bulan September, prestasi Dana meningkat sebanyak 2.40%, 75 mata asas lebih rendah berbanding prestasi Penanda Aras manakala bagi Tahun Terkini (YTD-FY)<sup>1</sup>, Dana mencatatkan pulangan sebanyak 6.94%, 108 mata asas lebih rendah berbanding Penanda Aras. Ini disebabkan oleh pelaburan yang lebih tinggi di dalam sektor Sarung Tangan dan saham terpilih dalam sektor Teknologi dan Hartanah. Sektor pembuatan Malaysia pada bulan September kekal stabil dengan bacaan Indeks Pembelian Pengurus (Purchasing Managers' Index, "PMI") berada pada 49.8 mata berbanding 49.9 mata pada bulan Ogos. Pesanan baru dilaporkan meningkat, firma-firma menyatakan bahawa terdapat pelancaran projek baru dan peningkatan dalam keyakinan pelanggan, terutamanya dalam ekonomi domestik. Firma turut didorong oleh kenaikan inflasi harga input dengan kadar sederhana yang berada pada paras terendah dalam masa lima bulan ketika tekanan pada harga barang mentah semakin menurun. Sentimen perniagaan bertambah kukuh berbanding bulan Ogos dengan tahap keyakinan terkini adalah yang tertinggi sejak bulan Februari. Para pengeluar kekal yakin dengan pertumbuhan keluaran pada tahun akan datang. Bacaan data PMI terkini menunjukkan bahawa pertumbuhan Keluaran Dalam Negara Kasar ("KDNK") pada suku ketiga tahun 2025 boleh menyaksikan peningkatan daripada suku sebelumnya. KDNK Malaysia meningkat sebanyak 4.40% pada suku kedua tahun 2025, sama seperti pada suku pertama tahun 2025. Bank Negara Malaysia ("BNM") kini menjangkakan pertumbuhan KDNK Malaysia berkembang sebanyak 4.00% - 4.80% pada tahun 2025 berbanding anggaran sebelum ini iaitu pada 4.50% - 5.50%. Sebahagian besar perubahan pada KDNK mencerminkan kesan tarif Amerika Syarikat ke atas perdagangan global. Manakala untuk Kadar Polisi Semalaman (OPR), pihak kami tidak menjangkakan sebarang perubahan berikutan pemotongan 25 mata asas oleh BNM pada bulan Julai. Kadar inflasi turut meningkat pada kadar 1.30% pada bulan Ogos berbanding 1.20% pada bulan Julai. Penilaian FBMS berada di bawah purata sejarah (historical mean) iaitu 18.1x. Pada pandangan pihak kami, postur dasar Kerajaan yang lebih jelas diperlukan, yang seharusnya dapat mengurangkan premium risiko semasa yang digunakan dalam pasaran (anggaran jurang hasil sebanyak 211 mata asas). Pihak kami melihat beberapa faktor seperti kekuatan yang mampan dalam pelaburan domestik (iaitu pelaburan langsung domestik (DDI) dan pelaburan langsung asing (FDI)), pengurangan defisit dan hutang kerajaan, khususnya inisiatif rasionalisasi subsidi dan pengukuhan mata Wang Ringgit, boleh menyumbang kepada pengencilan jurang kadar premium risiko dan seterusnya meningkatkan penilaian FBMS. Pasaran ekuiti serantau nampaknya telah pulih hampir sepenuhnya sejak penjualan disebabkan pengumuman tarif Amerika Syarikat (Liberation Day) pada bulan April, dan Malaysia juga tidak terkecuali. Walau bagaimanapun, memandangkan persekitaran global semasa yang tidak menentu, pihak kami percaya ketidaktentuan pasaran akan berterusan disebabkan oleh tindakan pentadbiran Amerika Syarikat. Dasar perdagangan Trump boleh menjelaskan keyakinan terhadap pasaran serta menekan prospek pertumbuhan dan pendapatan Malaysia. Walau bagaimanapun, risiko pertumbuhan menjadi perlahan sebahagiannya dapat diimbangi oleh beberapa inisiatif dan faktor domestik yang menyokong. Pihak kami mengekalkan pendekatan yang seimbang tetapi lebih cenderung ke arah sektor yang mempunyai pendapatan yang lebih jelas<sup>2</sup>.

## STRATEGI PELABURAN

Pada bulan September 2025, prestasi Dana meningkat sebanyak 2.09%, 14 mata asas lebih tinggi berbanding prestasi Penanda Aras. Bagi Tahun Terkini (YTD-FY)<sup>1</sup>, Dana mencatatkan pulangan sebanyak 7.16%, 199 mata asas lebih tinggi berbanding Penanda Aras. Sektor pembuatan Malaysia kekal stabil pada bulan September dengan bacaan Indeks Pembelian Pengurus (Purchasing Managers' Index, "PMI") berada pada 49.8 mata berbanding 49.9 mata pada bulan sebelumnya. Peningkatan dalam pesanan baru disumbangkan oleh pelancaran projek-projek baru dan tahap keyakinan pelanggan yang lebih tinggi, terutamanya dalam ekonomi domestik. Firma-firma juga mendapat dorongan daripada kenaikan inflasi harga input yang lebih sederhana, yang berada pada paras yang terendah dalam tempoh lima bulan, berikutan tekanan harga bahan mentah yang menurun. Sentimen perniagaan bertambah kukuh sejak bulan Ogos, dengan tahap keyakinan terkini adalah yang tertinggi sejak bulan Februari. Para pengeluar kekal yakin dengan pertumbuhan keluaran pada tahun yang akan datang. Bacaan data PMI terkini menunjukkan bahawa pertumbuhan Keluaran Dalam Negara Kasar ("KDNK") pada suku ketiga tahun 2025 boleh menyaksikan peningkatan daripada suku sebelumnya. KDNK Malaysia meningkat sebanyak 4.40% pada suku kedua tahun 2025 sama seperti pada suku pertama tahun 2025. Bank Negara Malaysia ("BNM") kini menjangkakan pertumbuhan KDNK Malaysia berkembang sebanyak 4.00% - 4.80% pada tahun 2025 berbanding anggaran sebelum ini iaitu pada 4.50% - 5.50%. Sebahagian besar perubahan pada KDNK mencerminkan kesan tarif Amerika Syarikat ke atas perdagangan global. Manakala untuk Kadar Polisi Semalaman (OPR), pihak kami tidak menjangkakan sebarang perubahan berikutan pemotongan 25 mata asas oleh BNM pada bulan Julai. Kadar inflasi turut meningkat pada kadar 1.30% pada bulan Ogos berbanding 1.20% pada bulan Julai. Pasaran ekuiti serantau nampaknya telah pulih hampir sepenuhnya sejak penjualan disebabkan pengumuman tarif Amerika Syarikat (Liberation Day) pada bulan April, dan Malaysia juga tidak terkecuali. Walau bagaimanapun, memandangkan persekitaran global semasa yang tidak menentu, pihak kami percaya ketidakpastian pasaran akan berterusan disebabkan oleh tindakan pentadbiran Amerika Syarikat. Dasar perdagangan Trump boleh menjejaskan keyakinan terhadap pasaran serta menekan prospek pertumbuhan dan pendapatan Malaysia. Walau bagaimanapun, risiko pertumbuhan menjadi perlahan sebahagiannya dapat diimbangi oleh beberapa inisiatif dan faktor domestik yang menyokong. Pihak kami mengekalkan pendekatan yang seimbang tetapi lebih cenderung ke arah sektor yang mempunyai pendapatan yang lebih jelas<sup>2</sup>.

## STRATEGI PELABURAN

Pada bulan September, prestasi Dana menurun sebanyak 0.05% mengatasi prestasi penanda aras sebanyak 0.26%. Bagi Tahun Terkini (YTD-FY)<sup>1</sup>, prestasi Dana berada pada 3.20%, 6 mata asas lebih rendah berbanding prestasi Penanda Aras. Pada bulan September, Sukuk Pelaburan Kerajaan Malaysia ("GII") menganjak lebih tinggi merentasi keluk sebanyak 6 mata asas hingga 13 mata asas dengan terbitan GII berjangka masa 10- dan 30-tahun masing-masing meningkat sebanyak 7 mata asas dan 10 mata asas menghampiri 3.50% dan 4.03%. Sentimen pasaran kekal lemah pada bulan September disebabkan oleh jangkaan pelonggaran dasar monetari selanjutnya mungkin tidak akan berlaku berikutan prospek ekonomi yang berdaya tahan, kadar tarif global yang lebih tinggi serta aktiviti pengambilan untung pada suku akhir yang meluas. Penjualan itu juga dirangsang oleh tekanan bekalan terbitan bon yang berjangka masa panjang dan potensi terbitan korporat baru yang kukuh. Kelemahan pasaran diburukkan lagi dengan perubahan indeks GBI-EM pada bulan September yang sebahagiannya telah menyumbang kepada aliran keluar asing pada bulan yang sama. Bank Negara Malaysia ("BNM") mengekalkan Kadar Polisi Semalaman (OPR) pada kadar yang sama iaitu 2.75% dalam mesyuarat Jawatankuasa Dasar Monetari pada bulan September. BNM melihat kadar ini sesuai untuk mengimbangi pertumbuhan dengan kestabilan harga. BNM juga menyatakan bahawa kesimpulan bon yang berjangka masa panjang untuk mendapatkan hasil yang lebih tinggi. Perhatian seterusnya akan tertumpu kepada pembentangan Belanjawan tahun 2026 yang dijangka menggariskan rangka kerja fiskal jangka masa sederhana Malaysia dan trajektori pertumbuhan. Sementara itu, pasaran dijangka kekal terikat menjelang Belanjawan tahun 2026. Secara keseluruhannya, pihak kami mengekalkan strategi semasa dan kekal melabur lebih dalam sukuk dalam segmen kredit untuk mendapatkan hasil yang lebih menguntungkan. Pihak kami mengekalkan pendirian melabur lebih panjang dari segi tempoh jangka masa berbanding penanda aras<sup>2</sup>.

## DANA BALANCED

|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Strategi & Pendekatan Pelaburan | Dana ini akan dilaburkan ke dalam pelbagai portfolio ekuiti yang patuh Syariah dan disenaraikan di Bursa Malaysia dan pelaburan Sukuk. Strategi dana adalah untuk mengekalkan keseimbangan portfolio di antara ekuiti yang patuh Syariah dan pelaburan pendapatan tetap dalam nisbah 60:40. Bahagian Sukuk di dalam Dana ini adalah untuk memberikan kestabilan modal kepada Dana ini, manakala bahagian ekuiti pula adalah untuk memberikan pulangan tambahan ketika pasaran meningkat naik.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Strategi & Pendekatan Pelaburan | Dana ini akan dilaburkan ke dalam pelbagai portfolio yang terdiri daripada Sukuk, instrumen pasaran wang jangka pendek dan pelaburan lain yang dibenarkan di bawah prinsip Syariah dan bertujuan untuk menyediakan aliran pendapatan yang stabil.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Peruntukan aset                 | <p>Portfolio pelaburan adalah tertakluk kepada perkara-perkara berikut:</p> <ul style="list-style-type: none"> <li>• Sehingga 98% dari Portfolio akan dilaburkan dalam sekuriti pendapatan tetap patuh Syariah;</li> <li>• Sekurang-kurangnya 2% dari Portfolio akan dilaburkan dalam aset cair patuh Syariah;</li> <li>• Penerbit minima bagi Kredit Jangka Panjang adalah "A3" seperti yang dinilai oleh Rating Agency Malaysia Berhad ("RAM") atau setaraf dengannya oleh Malaysia Rating Corporation Berhad ("MARC");</li> <li>• Penerbit minima bagi kredit Jangka Pendek adalah "P3" seperti dinilai oleh RAM atau setaraf dengannya oleh MARC;</li> <li>• Pendedahan portfolio kepada mana-mana entiti Sukuk tunggal (tidak terpakai kepada sekuriti kerajaan, sekuriti BNM, aset berisiko sederhana dan rendah yang diluluskan oleh BNM) tidak boleh melebihi 20% daripada NAV;</li> <li>• Nilai pegangan portfolio di dalam sukuk (tidak terpakai kepada sekuriti kerajaan, sekuriti BNM, aset berisiko sederhana dan rendah yang diluluskan oleh BNM) bagi mana-mana kumpulan syarikat tidak boleh melebihi 30% daripada NAV;</li> <li>• Instrumen Pasaran Kewang Islam Malaysia mesti lah sekurang-kurangnya "P3" oleh RAM atau yang setaraf;</li> <li>• Deposit patuh Syariah hanya boleh diletakkan di Institusi Kewangan berlesen oleh BNM.</li> </ul> |

Pelaburan tertakluk kepada risiko-risiko berikut:-

1. Risiko pasaran - Risiko yang berlaku disebabkan oleh persekitaran pasaran dan biasanya termasuk perubahan peraturan, politik, teknologi dan ekonomi. Kepelbagaian pelaburan Dana ke dalam dana amanah saham dari jenis berbeza (ekuiti atau bukan ekuiti) dan dengan pelbagai polisi dan strategi pelaburan dapat membantu meringankan pendedahannya pada ketidakpastian pasaran dan turun naik dalam pasaran.
2. Risiko kadar keuntungan - Risiko ini penting dalam dana Sukuk memandangkan pengurusan portfolio Sukuk bergantung pada jangkaan pergerakan kadar faedah. Secara amnya, permintaan bagi Sukuk bergerak secara songsang dengan pergerakan kadar faedah, maka apabila kadar faedah meningkat, permintaan bagi Sukuk menurun dan sebaliknya. Selain itu, Sukuk yang memiliki tempoh matang lebih lama dan kadar keuntungan lebih rendah adalah lebih mudah dipengaruhi oleh pergerakan kadar faedah. Sukuk tertakluk pada naik turun kadar faedah dengan tempoh matang lebih lama dan kadar faedah yang lebih rendah. Sukuk lebih mudah dipengaruhi oleh pergerakan kadar faedah sebegini. Risiko ini boleh dikurangkan melalui pengawasan dan penilaian pemboleh ubah mikro-ekonomi yang berterusan bagi memastikan strategi paling sesuai dilaksanakan untuk portfolio Dana.
3. Risiko Kredit/Ingkar - Bon tertakluk pada risiko kredit/ingkar apabila penerbit instrumen berdepan kesukaran kewangan, yang boleh mengurangkan kebolehpercayaan kredit mereka. Ini seterusnya menyebabkan keingkaran pembayaran bagi prinsipal dan faedah/keuntungan.
4. Risiko Kecairan - Kecairan merujuk pada mudahnya menukar sesuatu pelaburan kepada tunai tanpa menanggung kerugian nilai yang terlalu ketara. Sekiranya berlaku perkembangan negatif pada mana-mana penerbit, ini akan meningkatkan risiko kecairan bagi sekuriti tertentu. Ini kerana secara amnya, pembeli sedia bagi sekuriti itu akan berkurangan kerana kebimbangan terhadap meningkatnya keingkaran kredit. Risiko ini diuruskan dengan mengambil langkah lebih cermat dalam pemilihan dan kepelbagaian sekuriti.
5. Risiko Ketidakpatuhan - Tidak mematuhi undang-undang, peraturan, kawal selia, amalan yang ditetapkan, polisi dan prosedur dalaman boleh mengakibatkan reputasi tercemar, peluang perniagaan yang terhad dan potensi pengembangan yang menurun kepada syarikat pengurusan. Matlamat pelaburan pelabur juga mungkin terjejas apabila pengurus dana tidak mematuhi mandat pelaburan. Risiko ini dapat dikurangkan melalui kawalan dalaman dan pengawasan pada pematuhan.
6. Risiko Inflasi - Inflasi boleh didefinisikan sebagai kemungkinan kerugian tidak ketara yang terjadi akibat peningkatan harga barangan dan perkhidmatan dalam sesebuah ekonomi pada suatu jangka masa tertentu. Inflasi menyebabkan pengurangan kuasa membeli dan jika inflasi sentiasa tinggi dari kadar pulangan pelaburan, nilai sebenar pelaburan akhirnya mungkin negatif.
7. Risiko Penerbit - Risiko ini merujuk pada risiko persendirian masing-masing bagi syarikat yang menerbitkan sekuriti. Risiko khusus termasuk, tetapi tidak terhad kepada perubahan selera dan permintaan pengguna, tindakan guaman, persekitaran operasi yang kompetitif, keadaan industri yang berubah dan kealpaan dan ralat pengurusan. Bagaimanapun, risiko ini dikurangkan dengan melabur dalam pelbagai syarikat dari sektor berbeza lalu menyebabkannya berfungsi secara bebas dari yang lain.
8. Risiko negara - Pelaburan asing mungkin terkesan oleh risiko khusus bagi negara di mana pelaburan dibuat seperti perubahan pada asas ekonomi negara, kestabilan sosial dan politik, pergerakan mata wang, polisi pelaburan asing dan sebagainya. Risiko ini boleh dikurangkan dengan melakukan kajian terperinci pada pasaran masing-masing, keadaan ekonomi, syarikat, politik dan sosialnya selain mengurangkan atau tidak melabur dalam pasaran itu.
9. Risiko Pengurusan - Terdapat risiko bahawa pihak pengurusan tidak mematuhi mandat pelaburan bagi dana tertentu. Dengan pengawasan teliti yang dilakukan oleh jawatankuasa pelaburan, sistem operasi dalaman yang disepadukan dengan had dan kawalan, dan melaporkan secara kerap kepada pasukan pengurusan kanan, syarikat pengurusan dapat menguruskan risiko ini.
10. Risiko Pengurusan Dana - Pengurusan dana yang lemah yang disebabkan oleh kurang pengalaman, pengetahuan, kepakaran dan teknik pengurusan yang lemah boleh memberi kesan buruk pada prestasi dana. Ini boleh menyebabkan pelabur mengalami kerugian dalam pelaburan dana.
11. Risiko Syariah - Risiko yang terjadi dari kemungkinan semakan status sekuriti dalam dana amanah saham dari patuh Syariah kepada tidak patuh Syariah dan kemungkinan melabur dalam dana amanah saham tidak patuh Syariah. Risiko ini dapat dikurangkan dengan menerusi semakan berkala pada sekuriti berkenaan oleh Jabatan Pematuhan Syariah dan Jawatankuasa Syariah. Tindakan perlu diambil oleh Pengurus Dana bagi melupuskan sekuriti tersebut seperti yang dianjurkan oleh Jabatan Pematuhan Syariah dan Jawatankuasa Syariah.

## NOTA MENGENAI YURAN DAN CAJ

Pulangan Sebenar (Bersih dari Cukai dan Caj)

1. Prestasi dana sebelum ini tidak menjadi indikasi bagi prestasi akan datang.
2. Ini adalah prestasi dana pelaburan semata-mata, dan bukan pulangan yang diperoleh dari caruman sebenar yang dibayar oleh produk terangkai pelaburan.
3. Unit dicipta dan dibatalkan pada tarikh penentuan harga akan datang, masing-masing lanjutan dari penerimaan caruman atau pemberitahuan tuntutan.
4. Prestasi sebelum ini dikira berdasarkan Nilai Aset Bersih (NAV).

## MAKLUMAT LAIN

Asas & Kekerapan Penilaian Unit

1. Harga unit bagi mana-mana tarikh penilaian dana ditentukan dengan membahagikan NAV pada hari perniagaan sebelum tarikh penilaian dengan bilangan unit yang diterbitkan bagi dana berkenaan.
2. NAV ditentukan seperti berikut:
  - a) Harga pasaran transaksi terakhir di mana aset itu boleh dibeli atau dijual,
  - b) Tambah bilangan tunai dalam pegangan yang belum dilaburkan
  - c) Tambah sebarang pendapatan terakru atau dijangka
  - d) Tolak sebarang perbelanjaan yang dikeluarkan semasa membeli atau menjual aset
  - e) Tolak sebarang jumlah liabiliti Dana
  - f) Tolak jumlah yang berkaitan dengan menguruskan, menyelenggara dan menilai aset
3. Bagi memastikan layanan yang adil kepada semua pemegang unit, Pengurus Dana boleh mengenakan kos transaksi bagi memiliki atau melupuskan aset Dana, jika kos itu adalah ketara. Bagi mendapatkan semula kos memperoleh dan melupuskan aset, Pengurus perlu membuat pencairan aset atau pelarasan kos transaksi NAV seunit bagi mendapatkan semula jumlah Dana yang sudah dibayar atau dijangka dengan wajar bagi membayar penciptaan atau pembatalan aset.
4. Penilaian unit dibuat secara hari an pada setiap Hari Perniagaan.

Keadaan Tertentu

Pengurus boleh mengambil tindakan berikut yang mungkin menjadi perlu disebabkan oleh perubahan keadaan, sebagai cara melindungi kepentingan Peserta:-

1. Tertakluk pada sekurang-kurangnya tiga (3) bulan notis bertulis, Pengurus boleh:
  - a) Menutup Dana atau berhenti membenarkan peruntukan caruman tambahan atau mengalihkan aset ke dana baru yang mempunyai objektif pelaburan yang sama;
  - b) Menukar nama Dana
  - c) Membahagikan atau menggabungkan unit Dana sedia ada;
  - d) Membuat sebarang perubahan yang diperlukan yang disebabkan oleh keperluan kawal selia dan/atau perundangan.
2. Pengurus juga boleh memilih, tanpa notis terdahulu, bagi menggantung harga unit dan transaksi Sijil jika mana-mana bursa atau syarikat pengurusan amanah saham di mana Dana dilaburkan adalah digantung sementara dari membuat perdagangan.
