Benchmark (%)	2.76	-3.89	2.17	21.34	44.18

REVIEW & INVESTMENT STRATEGY

The Fund was up 3.16% for the month outperforming its benchmark by 0.40%. The Industrial and Basic Materials sectors contributed positively. At the stock level, overweight in Westports and underweight in Petronas Chemicals contributed. The government has guided for lower Gross Domestic Product ("GDP") growth of 4.5-5.5%. Nevertheless, Small and Medium Enterprise ("SME") continue to do well in Malaysia. Although, business loan growth moderated, (+7.7% vs. +8.3% in Nov) the moderation was due mainly to large corporations, while SME loan growth saw an acceleration. Further, as labour cost increased in China to levels comparable to Malaysia and amid fears of copyright protection there, SMEs here have experienced increased orders from multinationals. The market price earnings ratio ("PER") has increased to 15.4 times and 14.1 times for 2015 and 2016 –FTSE Bursa Malaysia Kuala Lumpur Composite Index ("KLCI"): 1781.26 as at January 31, 2015. Corresponding earnings per share ("EPS") growth rates are at 8.0% and 9.0% respectively. At the standard target PER of 15 times for 2015, the KLCI is fair at 1735. The risk to growth remains on the downside.

With the Ringgit remaining weak, we like companies with US Dollar ("USD") revenues. We prefer exporters able to hold on to the currency gains. The low crude oil price is positive for logistic players. They should also benefit from the improving foreign direct investment ("FDI") outlook with the lower Ringgit. We have raised our equity allocation but portfolios will be positioned defensively. We are overweight Telecommunications, Utilities, Transport and Construction and underweight Plantations and Properties.

Benchmark (%)	1.75	-1.77	2.43	16.11	33.95

REVIEW & INVESTMENT STRATEGY

The Fund was up 2.17% in December, outperforming the benchmark by 0.42\$ basis points ("bps"). During the month, both equities and fixed income outperformed. For equities, the outperformance was partly due to the fund's overweight position in MYEG and Kossan as well as the rebound in SapuraKencana. For fixed income, the main contributors were from banks, plantations and power related bonds in the Fund.

The government has guided for lower Gross Domestic Product ("GDP") growth of 4.5-5.5%. Nevertheless, Small and Medium Enterprise ("SME") continue to do well in Malaysia. Although, business loan growth moderated, (+7.7% vs. +8.3% in November) the moderation was due mainly to large corporations, while SME loan growth saw an acceleration. Further, as labour cost increased in China to levels comparable to Malaysia and amid fears of copyright protection there, SMEs here have experienced increased orders from multinationals. The market price earnings ratio ("PER") has increased to 15.4 times and 14.1 times for 2015 and 2016 –FTSE Bursa Malaysia Kuala Lumpur Composite Index ("KLCI"): 1781.26 as at January 31, 2015. Corresponding earnings per share ("EPS") growth rates are at 8.0% and 9.0% respectively. At the standard target PER of 15 times for 2015, the KLCI is fair at 1735. The risk to growth remains on the downside.

In spite of the slowing environment, we continue to favour growth stocks with sustainable earnings. In terms of sectors, we like Utilities, Telecommunications and Construction, as well as selected stocks in Technology and Rubber Gloves. We continue to underweight the Oil & Gas sector due to increased risk of project deferments by oil majors. For fixed income, we will maintain a trading stance on government securities and continue to overweight corporate bonds with focus on higher rated issues.

Benchmark (%)	0.24	1.44	2.88	8.66	14.48

REVIEW & INVESTMENT STRATEGY

The Fund reported a return of 0.40% in January 2015 underperformed its benchmark's return of 0.24% in January 2015.

Sovereign bond yields moved lower in January 2015 due to better buying interest from local investors after the Government revised its budget estimates and also partly due to the spill-over effect of the European Central Bank ("ECB") decision to launch its long-awaited bid to revitalize the Euro zone economy and counter deflation with a EUR 60 billion monthly bond buying programme which was far larger than investors had expected.

Yields of the Malaysian Government Securities appeared to be rich in valuation after the rally in January 2015 resulting in an extremely flat yield curve. However, the unexpected policy rate cuts by global central bankers may see demand for the local sovereign bonds. Meanwhile, expectation of further Overnight Policy rate ("OPR") hike in 2015 has diminished due to signs of weakening economy.

We expect the rally to spillover to corporate bonds hence we expect credit spread to be within range in the short term but tightening in the medium term. We aim to be fully invested with neutral benchmark duration. We prefer to focus on selective lower rated new corporate sukuk for yield enhancement and trade on longer end higher rated corporate sukuk segment as an alternative to the government securities for yield pick up.

GROWTH FUND

Investment Strategy & Approach	The fund will invest in Shariah compliant equities listed on Bursa Malaysia whereby the target investments will be large cap stocks with growth prospects and where trading is fairly liquid.
Asset Allocation	<p>The investment portfolio is subjected to the following:</p> <ul style="list-style-type: none"> • Up to 98% of the Portfolio shall be invested in Shariah compliant equity securities; • At least 2% of the Portfolio will be invested in Shariah based liquid assets; • The value of the Portfolio's holding of the share capital of any single issuer must not exceed 10% of total asset of Portfolio; • The value of the Portfolio's holding in transferable securities issued by any single issuer must not exceed 15% of the Portfolio's Net Asset Value (NAV); • The value of the Portfolio's holding of the share capital of any group of companies must not exceed 20% of total asset of the Portfolio; • Shariah-compliant deposits can only be placed in licensed Financial Institutions by Bank Negara Malaysia (BNM).

BALANCED FUND

Investment Strategy & Approach	The Portfolio will invest in diversified portfolio of Shariah compliant equities listed on Bursa Malaysia and Sukuk investments. The strategy of the fund is to maintain a balanced portfolio between Shariah compliant equities and fixed income investments in the ratio of 60:40. The Sukuk portion of the Fund is to provide some capital stability to the Fund whilst the equity portion will provide the added return in a rising market.
Asset Allocation	<p>The investment portfolio is subjected to the following:</p> <ul style="list-style-type: none"> • Up to 60% of the Portfolio shall be invested in Shariah compliant equity securities; • Investment in fixed income securities and liquid assets shall not be less than 40% of the Portfolio's NAV; • At least 2% of the Portfolio will be invested in Shariah based liquid assets; • The value of the Portfolio's holding of the share capital of any single issuer must not exceed 10% of total asset of Portfolio; • The value of the Portfolio's holding in transferable securities issued by any single issuer must not exceed 15% of the Portfolio's NAV; • The value of the Portfolio's holding of the share capital of any group of companies must not exceed 20% of total asset of the Portfolio; • Minimum Long Term Issuer Credit Rating of "A3" as assessed by Rating Agency Malaysia Berhad ("RAM") or equivalent by Malaysia Rating Corporation Berhad ("MARC"); • Minimum Short Term Issuer Credit Rating of "P3" as assessed by RAM or equivalent by MARC; • Shariah-compliant deposits can only be placed in licensed Financial Institutions by BNM.

FIXED INCOME FUND

Investment Strategy & Approach	The investment strategy of the fund is to invest in a diversified portfolio consisting of Sukuk, short term money market instruments and other permissible investments under the Shariah principles and aim to provide a steady stream of income.
Asset Allocation	<p>The investment portfolio is subjected to the following:</p> <ul style="list-style-type: none"> • Up to 98% of the Portfolio shall be invested in Shariah compliant fixed income securities; • At least 2% of the Portfolio will be invested in Shariah based liquid assets; • Minimum Long Term Issuer Credit Rating of "A3" as assessed by RAM or equivalent by MARC; • Minimum Short Term Issuer Credit Rating of "P3" as assessed by RAM or equivalent by MARC; • The exposure to any single entity for sukuk (not applicable to government securities, BNM's securities, quasi and low risk assets granted by BNM) shall not exceed 20% of the NAV of the Portfolio; • The value of the Portfolio's holding in sukuk (not applicable to government securities, BNM's securities, quasi and low risk assets granted by BNM) of any group of companies must not exceed 30% of the NAV of the Portfolio; • The Malaysian Islamic Money Market Instruments must be rated at least P3 by RAM or equivalent; • Shariah-compliant deposits can only be placed in licensed Financial Institutions by BNM.

The investment is subject to the following risks:-

1. **Market risk** - The risk that arises due to developments in the market environment and typically includes changes in regulations, politics, technology and the economy. Diversification of the Fund's investments into different unit trust funds of different types (equity or non-equity etc.) and with different investment policy and strategies may help to mitigate its exposure to market uncertainties and fluctuations in the market.
2. **Profit rate risk** - This risk is crucial in a Sukuk fund since Sukuk portfolio management depends on forecasting interest rate movements. Generally, demand for Sukuk move inversely to interest rate movements therefore as interest rates rise, the demand for Sukuk decrease and vice versa. Furthermore, Sukuk with longer maturity and lower profit rates are more susceptible to interest rate movements. Sukuk are subject to interest rate fluctuations with longer maturity and lower profit rates Sukuk being more susceptible to such interest rate movements. This risk can be mitigated through continuous monitoring and evaluation of macro-economic variables to ensure the most appropriate strategy is in place for the Fund's portfolio.
3. **Credit / Default Risk** - Bonds are subject to credit/default risk in the event that the issuer of the instrument is faced with financial difficulties, which may decrease their credit worthiness. This in turn may lead to a default in the payment of principal and interest/ profit.
4. **Liquidity Risk** - Liquidity refers to the ease of converting an investment into cash without incurring an overly significant loss in value. Should there be negative developments on any of the issuers, this will increase liquidity risk of the particular security. This is because there are generally less ready buyers of such securities as the fear of a credit default increases. The risk is managed by taking greater care in security selection and diversification.
5. **Non-compliance risk** - Non-adherence with laws, rules, regulations, prescribed practices, internal policies and procedures may result in tarnished reputation, limited business opportunities and reduced expansion potential for the management company. Investor's investment goals may also be affected should the fund manager not adhere to the investment mandate. This risk can be mitigated through internal controls and compliance monitoring.
6. **Inflation Risk** - Inflation risk can be defined as potential intangible losses that may arise from the increase in prices of goods and services in an economy over a period of time. Inflation causes the reduction in purchasing power and if the rate of inflation is constantly higher than the rate of returns on investments, the eventual true value of investments could be negative.
7. **Issuer risk** - This risk refers to the individual risk of the respective companies issuing the securities. Specific risk includes, but is not limited to changes in consumer tastes and demand, legal suits, competitive operating environments, changing industry conditions and management omissions and errors. However, this risk is minimised through investing in a wide range of companies in different sectors and thus function independently from one another.
8. **Country risk** - The foreign investments may be affected by risks specific to the country in which investments are made such as changes in a country's economic fundamentals, social and political stability, currency movements, foreign investment policies and etc. This risk may be mitigated by conducting thorough research on the respective markets, their economies, companies, politics and social conditions as well as minimising or omitting investments in such markets.
9. **Management Risk** - There is risk that the management may not adhere to the investment mandate of the respective fund. With close monitoring by the investment committee, back office system is being incorporated with limits and controls, and regular reporting to the senior management team, the management company is able to manage such as risk.
10. **Fund Management Risk** - Poor management of the fund due to lack of experience, knowledge, expertise and poor management techniques would have an adverse impact on the performance of the fund. This may result in investors suffering loss on their investment of the fund.
11. **Shariah risk** - The risk that arises from potential revision on the status of the securities in the unit trust fund from Shariah compliant to non-Shariah compliant and the possibility of investing in non-Shariah compliant unit trust funds. This risk may be mitigated by conducting periodic review by Shariah Compliance Department and Shariah Committee. Thus necessary action to be taken by Fund Manager to dispose such securities as per advice by Shariah Compliance Department and Shariah Committee.

NOTES ON FEES AND CHARGES

Actual Returns
(Net of Tax and Charges)

1. Past performance of the fund is not an indication of its future performance.
2. This is strictly the performance of the investment fund, and not the returns earned on the actual contributions paid of the investment-linked product.
3. Units are created and cancelled at the next pricing date following receipt of contribution or notification of claim respectively.
4. Past performance is calculated based on the Net Asset Value (NAV). The formula of calculation is as follows:

$$\text{Investment Return} = \left\{ \left(\frac{\text{NAV 31 March Year X}}{\text{NAV 31 March Year (X-1)}} \right) - 1 \right\} \times 100$$

OTHER INFORMATION

Basis & Frequency of
Unit Valuation

1. The unit price on any valuation date of a fund shall be obtained by dividing the NAV on the business day before the valuation date by the number of units in issue of the relevant fund.
2. The NAV shall be determined as follows:-
 - a) The last transacted market price at which those assets could be purchased or sold,
 - b) Plus the amount of cash held uninvested
 - c) Plus any accrued or anticipated income
 - d) Less any expenses incurred in purchasing or selling assets
 - e) Less any amount for the liabilities of the Fund
 - f) Less the amount in respect of managing, maintaining and valuing the assets
3. To ensure fair treatment to all unit holders, the Fund Manager may impute the transaction costs of acquiring or disposing of assets of the Fund, if the costs are significant. To recoup the cost of acquiring and disposing of assets, the Manager shall make a dilution or transaction cost adjustment to the NAV per unit to recover any amount which the Fund had already paid or reasonably expects to pay for the creation or cancellation of units.
4. Unit valuation is performed on a daily basis on each Business Day.

Exceptional Circumstances

The Manager may take the following actions that may become necessary due to change of circumstances, as a means to protect the interest of Participants:-

1. Subject to at least three (3) months written notice, the Manager may:-
 - a) Close the Fund or cease to allow the allocation of additional contribution or to transfer the assets to a new fund which has similar investment objectives;
 - b) Change the name of the Fund
 - c) Split or combine existing units of the Fund;
 - d) Make any changes that may be required due to regulatory requirement and/or legislation.
2. The Manager may also choose to, without prior notice, suspend unit pricing and Certificate transactions if any of the exchanges or unit trust management company in which the Fund is invested is temporarily suspended for trading.
