REVIEW & INVESTMENT STRATEGY

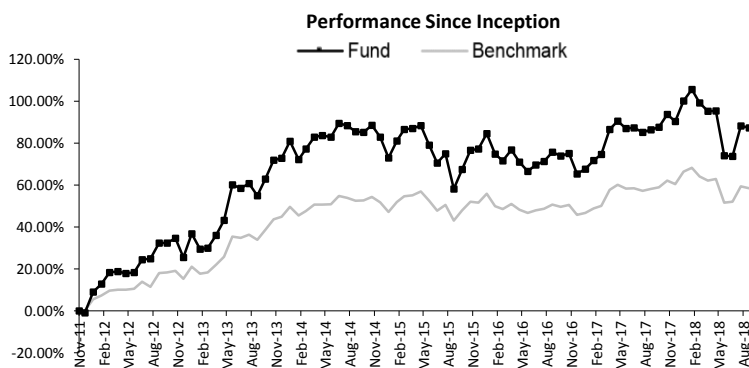

The Fund fell by 6.00% in October 2018, outperforming the benchmark by 1.15%. Outperformance came from the cash holdings, overweight on Industrial and underweight on Telecommunication sectors. At the stock level, the fund affected by the overweight in Serba Dinamik and underweight on Gamuda and MYEG. Year-to-date (YTD-FY), the fund has outperformed by 1.78% against the Benchmark.

October saw foreign investors sold RM1.5bil versus net buy of RM0.1bil in the previous month. Total outflow for 10M2018 amounted to RM10.0bil vs. net inflow of RM10.8b in 2017. At 1,709 pts, KLCI is trading at 16.5x Price to Earnings Ratio, which is fair as compared to its historical average. Consensus is looking at 3% earnings growth for 2018 and 6% for 2019 and we are off the view that with the lower GDP projection of below 5% by the Government for 2018 and 2019, consensus's corporate earnings growth outlook for 2018 and 2019 will be put to the test.

We continue to reiterate our short-term cautious stance on the domestic market for rest of 2018 and 1Q2019. We deemed the recent Budget as progressive for the future but having Neutral impact to the market in the short-term. Targeted spending on B40 Group and tax refunds will be positive for consumer sectors while higher fiscal deficits will put the government with limited safety net in the event of global meltdown. Focus for domestic investors will now turn to global, especially the US Mid-Term Election and FED. On the back of all these uncertainties, we reiterated our capital preservation investment strategy with preference on big cap GLCs and companies with strong fundamentals and solid cash flow and dividends in sectors such as Utilities & Renewable Energy and Industrials. We are also positive on Exporters as US-China trade conflicts may benefit technology-related and Electronics Manufacturing Services ("EMS") players in Malaysia.

Note: YTD-FY reflects the period beginning 1 April 2018

REVIEW & INVESTMENT STRATEGY

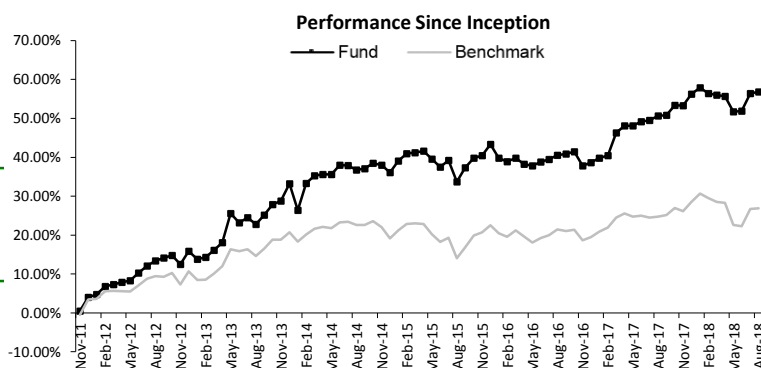

In October 2018, the Fund declined by 3.27%, outperforming the index by 0.91%. Year-to-date (YTD-FY), the Fund declined by 2.84%, outperforming the Benchmark by 3.06%. Shariah Equities outperformed Sukuk. Underweight call on telecommunication names such as Axiata, Digi and Maxis was the main contributor to the outperformance.

The FTSE Bursa Malaysia Shariah Index (FBMS) ended October lower by 7.15% or 906 pts to close at 11,771 pts. On Year-to-Date basis, the FBMS is lower by 11.51%. The release of the mid-term review of the austere 11th Malaysia Plan offered no reprieve as investors further locked in gains made due to rising economic risk and uncertainties. October saw foreign investors sold RM1.5bil versus net buy of RM0.1bil in the previous month. Total outflow for 10M2018 amounted to RM10.0bil vs. net inflow of RM10.8b in 2017. At 1,709 pts, KLCI is trading at 16.5x Price to Earnings Ratio, which is fair as compared to its historical average. Consensus is looking at 3% earnings growth for 2018 and 6% for 2019 and we are off the view that with the lower GDP projection of below 5% by the Government for 2018 and 2019, consensus's corporate earnings growth outlook for 2018 and 2019 will be put to the test.

For Malaysia, We continue to reiterate our short-term cautious stance on the domestic market for rest of 2018 and 1Q2019. We deemed the recent Budget as progressive for the future but having Neutral impact to the market in the short-term. Targeted spending on B40 Group and tax refunds will be positive for consumer sectors while higher fiscal deficits will put the government with limited safety net in the event of global meltdown.

REVIEW & INVESTMENT STRATEGY

The Fund's performance for the month of October was 0.32% outperforming its benchmark by 0.05%.

During the month, the Government Investment Issues ("GII") yield curve steepened where a larger than expected 10-year GII re-opening drove up the belly of the curve by 11bps. Credit spreads continued to tighten in October by 1-12 bps across the entire credit curve, brushing off the impact of steeper sovereign yield curve. In Budget 2019, the Government projects a higher fiscal deficit of 3.7% of GDP for 2018, an increase of 0.9% from the initial target of 2.8%. The Government remains committed to medium-term consolidation and expects to reduce the fiscal deficit to 3.4% in 2019, 3.0% in 2020 and 2.8% in 2021. As a result of higher fiscal deficit, government bond supply is expected to increase in 2018 and 2019. Concerns on rating agencies actions and larger debt supply may continue to push yield curve higher albeit with no domestic policy actions expected in the near-term. Overall, we remain focus on corporate segment for a more stable and higher yield pick up to anchor the Fund.

GROWTH FUND

Investment Strategy & Approach	The fund will invest in Shariah compliant equities listed on Bursa Malaysia whereby the target investments will be large cap stocks with growth prospects and where trading is fairly liquid.
Asset Allocation	<p>The investment portfolio is subjected to the following:</p> <ul style="list-style-type: none"> • Up to 98% of the Portfolio shall be invested in Shariah compliant equity securities; • At least 2% of the Portfolio will be invested in Shariah based liquid assets; • The value of the Portfolio's holding of the share capital of any single issuer must not exceed 10% of total asset of Portfolio; • The value of the Portfolio's holding in transferable securities issued by any single issuer must not exceed 15% of the Portfolio's Net Asset Value (NAV); • The value of the Portfolio's holding of the share capital of any group of companies must not exceed 20% of total asset of the Portfolio; • Shariah-compliant deposits can only be placed in licensed Financial Institutions by Bank Negara Malaysia (BNM).

BALANCED FUND

Investment Strategy & Approach	The Portfolio will invest in diversified portfolio of Shariah compliant equities listed on Bursa Malaysia and Sukuk investments. The strategy of the fund is to maintain a balanced portfolio between Shariah compliant equities and fixed income investments in the ratio of 60:40. The Sukuk portion of the Fund is to provide some capital stability to the Fund whilst the equity portion will provide the added return in a rising market.
Asset Allocation	<p>The investment portfolio is subjected to the following:</p> <ul style="list-style-type: none"> • Up to 60% of the Portfolio shall be invested in Shariah compliant equity securities; • Investment in fixed income securities and liquid assets shall not be less than 40% of the Portfolio's NAV; • At least 2% of the Portfolio will be invested in Shariah based liquid assets; • The value of the Portfolio's holding of the share capital of any single issuer must not exceed 10% of total asset of Portfolio; • The value of the Portfolio's holding in transferable securities issued by any single issuer must not exceed 15% of the Portfolio's NAV; • The value of the Portfolio's holding of the share capital of any group of companies must not exceed 20% of total asset of the Portfolio; • Minimum Long Term Issuer Credit Rating of "A3" as assessed by Rating Agency Malaysia Berhad ("RAM") or equivalent by Malaysia Rating Corporation Berhad ("MARC"); • Minimum Short Term Issuer Credit Rating of "P3" as assessed by RAM or equivalent by MARC; • Shariah-compliant deposits can only be placed in licensed Financial Institutions by BNM.

FIXED INCOME FUND

Investment Strategy & Approach	The investment strategy of the fund is to invest in a diversified portfolio consisting of Sukuk, short term money market instruments and other permissible investments under the Shariah principles and aim to provide a steady stream of income.
Asset Allocation	<p>The investment portfolio is subjected to the following:</p> <ul style="list-style-type: none"> • Up to 98% of the Portfolio shall be invested in Shariah compliant fixed income securities; • At least 2% of the Portfolio will be invested in Shariah based liquid assets; • Minimum Long Term Issuer Credit Rating of "A3" as assessed by RAM or equivalent by MARC; • Minimum Short Term Issuer Credit Rating of "P3" as assessed by RAM or equivalent by MARC; • The exposure to any single entity for sukuk (not applicable to government securities, BNM's securities, quasi and low risk assets granted by BNM) shall not exceed 20% of the NAV of the Portfolio; • The value of the Portfolio's holding in sukuk (not applicable to government securities, BNM's securities, quasi and low risk assets granted by BNM) of any group of companies must not exceed 30% of the NAV of the Portfolio; • The Malaysian Islamic Money Market Instruments must be rated at least P3 by RAM or equivalent; • Shariah-compliant deposits can only be placed in licensed Financial Institutions by BNM.

The investment is subject to the following risks:-

1. **Market risk** - The risk that arises due to developments in the market environment and typically includes changes in regulations, politics, technology and the economy. Diversification of the Fund's investments into different unit trust funds of different types (equity or non-equity etc.) and with different investment policy and strategies may help to mitigate its exposure to market uncertainties and fluctuations in the market.
2. **Profit rate risk** - This risk is crucial in a Sukuk fund since Sukuk portfolio management depends on forecasting interest rate movements. Generally, demand for Sukuk move inversely to interest rate movements therefore as interest rates rise, the demand for Sukuk decrease and vice versa. Furthermore, Sukuk with longer maturity and lower profit rates are more susceptible to interest rate movements. Sukuk are subject to interest rate fluctuations with longer maturity and lower profit rates Sukuk being more susceptible to such interest rate movements. This risk can be mitigated through continuous monitoring and evaluation of macro-economic variables to ensure the most appropriate strategy is in place for the Fund's portfolio.
3. **Credit / Default Risk** - Bonds are subject to credit/default risk in the event that the issuer of the instrument is faced with financial difficulties, which may decrease their credit worthiness. This in turn may lead to a default in the payment of principal and interest/ profit.
4. **Liquidity Risk** - Liquidity refers to the ease of converting an investment into cash without incurring an overly significant loss in value. Should there be negative developments on any of the issuers, this will increase liquidity risk of the particular security. This is because there are generally less ready buyers of such securities as the fear of a credit default increases. The risk is managed by taking greater care in security selection and diversification.
5. **Non-compliance risk** - Non-adherence with laws, rules, regulations, prescribed practices, internal policies and procedures may result in tarnished reputation, limited business opportunities and reduced expansion potential for the management company. Investor's investment goals may also be affected should the fund manager not adhere to the investment mandate. This risk can be mitigated through internal controls and compliance monitoring.
6. **Inflation Risk** - Inflation risk can be defined as potential intangible losses that may arise from the increase in prices of goods and services in an economy over a period of time. Inflation causes the reduction in purchasing power and if the rate of inflation is constantly higher than the rate of returns on investments, the eventual true value of investments could be negative.
7. **Issuer risk** - This risk refers to the individual risk of the respective companies issuing the securities. Specific risk includes, but is not limited to changes in consumer tastes and demand, legal suits, competitive operating environments, changing industry conditions and management omissions and errors. However, this risk is minimised through investing in a wide range of companies in different sectors and thus function independently from one another.
8. **Country risk** - The foreign investments may be affected by risks specific to the country in which investments are made such as changes in a country's economic fundamentals, social and political stability, currency movements, foreign investment policies and etc. This risk may be mitigated by conducting thorough research on the respective markets, their economies, companies, politics and social conditions as well as minimising or omitting investments in such markets.
9. **Management Risk** - There is risk that the management may not adhere to the investment mandate of the respective fund. With close monitoring by the investment committee, back office system is being incorporated with limits and controls, and regular reporting to the senior management team, the management company is able to manage such as risk.
10. **Fund Management Risk** - Poor management of the fund due to lack of experience, knowledge, expertise and poor management techniques would have an adverse impact on the performance of the fund. This may result in investors suffering loss on their investment of the fund.
11. **Shariah risk** - The risk that arises from potential revision on the status of the securities in the unit trust fund from Shariah compliant to non-Shariah compliant and the possibility of investing in non-Shariah compliant unit trust funds. This risk may be mitigated by conducting periodic review by Shariah Compliance Department and Shariah Committee. Thus necessary action to be taken by Fund Manager to dispose such securities as per advice by Shariah Compliance Department and Shariah Committee.

NOTES ON FEES AND CHARGES

Actual Returns
(Net of Tax and Charges)

1. Past performance of the fund is not an indication of its future performance.
2. This is strictly the performance of the investment fund, and not the returns earned on the actual contributions paid of the investment-linked product.
3. Units are created and cancelled at the next pricing date following receipt of contribution or notification of claim respectively.
4. Past performance is calculated based on the Net Asset Value (NAV). The formula of calculation is as follows:

$$\text{Investment Return} = \left[\left(\frac{\text{NAV 31 March Year X}}{\text{NAV 31 March Year (X-1)}} \right) - 1 \right] \times 100$$

OTHER INFORMATION

Basis & Frequency of
Unit Valuation

1. The unit price on any valuation date of a fund shall be obtained by dividing the NAV on the business day before the valuation date by the number of units in issue of the relevant fund.
2. The NAV shall be determined as follows:-
 - a) The last transacted market price at which those assets could be purchased or sold,
 - b) Plus the amount of cash held uninvested
 - c) Plus any accrued or anticipated income
 - d) Less any expenses incurred in purchasing or selling assets
 - e) Less any amount for the liabilities of the Fund
 - f) Less the amount in respect of managing, maintaining and valuing the assets
3. To ensure fair treatment to all unit holders, the Fund Manager may impute the transaction costs of acquiring or disposing of assets of the Fund, if the costs are significant. To recoup the cost of acquiring and disposing of assets, the Manager shall make a dilution or transaction cost adjustment to the NAV per unit to recover any amount which the Fund had already paid or reasonably expects to pay for the creation or cancellation of units.
4. Unit valuation is performed on a daily basis on each Business Day.

Exceptional Circumstances

The Manager may take the following actions that may become necessary due to change of circumstances, as a means to protect the interest of Participants:-

1. Subject to at least three (3) months written notice, the Manager may:-
 - a) Close the Fund or cease to allow the allocation of additional contribution or to transfer the assets to a new fund which has similar investment objectives;
 - b) Change the name of the Fund
 - c) Split or combine existing units of the Fund;
 - d) Make any changes that may be required due to regulatory requirement and/or legislation.
2. The Manager may also choose to, without prior notice, suspend unit pricing and Certificate transactions if any of the exchanges or unit trust management company in which the Fund is invested is temporarily suspended for trading.
